

THE ACCESS FOR CARE PLATFORM

Access
for CARE

Effective risk management corporate governance

Within the care sector, it is hard to overstate the importance of effective risk management and corporate governance. Not only because it is the basis on which the industry regulator benchmarks the success of the individual care home, but also because it is the sector which deals with the care of people who are often in a vulnerable state: the elderly, young children and those who are mentally or physically disabled.

Access for Care platform provides the tools and resources to enable care sector organisations to effectively manage their affairs and ensures that all actions have been stored and monitored in a complete, auditable, disaster recover solution.

HR and Health & Safety Documents

The *Document Create* functionality allows you to create, track and distribute compliant HR and Health & Safety documentation.

Risk Management

The *Risk Management* module enables the creation of bespoke risk analyses as well as tailored risk assessments which can be stored and distributed within the system.

Employee Management

The *Employee* module allows you to store all relevant employee details as well as tracking training, holidays, qualifications and CPD.

News Update and Reference Service

The *News* module allows you to stay up-to-date with the latest care sector, HR and Health & Safety news as well as changes in legislation and regulatory compliance. All updates are stored within the system and can be searched by key term to create a fully functional reference database.

Knowledge Centre

The *Knowledge* module provides a comprehensive 'How to' section detailing up-to-date legislative Care, HR and Health & Safety information, all in plain English.

AQAA Compliance

The AQAA module provides an on-line resource for completing the AQAA as well as storing all relevant information and providing a platform for demonstrating implementation of best practice.

Communications Platform

The *Marketing* module provides an ideal tool to manage and distribute campaigns, track communications and monitor effectiveness.

Activities Management

The *Calendar* module integrates with the Activity Task List as well as Marketing and Risk modules to allow full control of daily, weekly, monthly and annual tasks, including HR, Health & Safety and Risk improvements.

Resident, Contacts and Supplier Databases

The *Residents*, *Contacts* and *Suppliers* modules create one point of reference for all individual and company information.

FAQ's and Trouble Shooting

The *FAQ* and *Trouble Ticket* modules allow you to effectively manage complaints procedures as well as providing a point of reference for compliance issues and frequently asked questions.
