

ACCESS FOR CONSTRUCTION PLATFORM

Access
for CONSTRUCTION

Effective risk management and corporate governance

In response to the emergence of scandals involving many high-profile companies during the 1990s, corporate governance within the construction sector became an area for immediate reform. These changes together with a rise in competition and increasing governmental regulations are placing increasing pressures upon the business owner, adding significant time and cost burdens upon the day-to-day running of the organisation.

The Access for Construction platform provides the tools and resources to enable construction sector organisations to effectively manage their affairs and ensures that all actions have been stored and monitored in a complete, auditable, disaster recover solution.

HR and Health & Safety Documents

The *Document Create* functionality allows you to create, track and distribute compliant HR and Health & Safety documentation.

Risk Management

The *Risk Management* module enables the creation of bespoke risk analyses as well as tailored risk assessments which can be stored and distributed within the system.

Employee Management

The *Employee* module allows you to store all relevant employee details as well as tracking training, holidays, qualifications and CPD.

News Update and Reference Service

The *News* module allows you to stay up-to-date with the latest construction sector, HR and Health & Safety news as well as changes in legislation and regulatory compliance. All updates are stored within the system and can be searched by key term to create a fully functional reference database.

Knowledge Centre

The *Knowledge* module provides a comprehensive 'How to' section detailing up-to-date legislative Construction, HR and Health & Safety information, all in plain English.

Site Management

The *Site Management* Module provides an on-line platform to store and record the details of all relevant site information.

Communications Platform

The *Marketing* module provides an ideal tool to manage and distribute campaigns, track communications and monitor effectiveness.

Activities Management

The *Calendar* module integrates with the Activity Task List as well as Marketing and Risk modules to allow full control of daily, weekly, monthly and annual tasks, including HR, Health & Safety and Risk improvements.

Contacts and Suppliers Database

The *Contacts and Suppliers* modules create one point of reference for all individual and company information, providing an integrated resource for recording all Communications, Invoices and Sales Orders.

FAQ's and Trouble Shooting

The *FAQ* and *Trouble Ticket* modules allow you to effectively manage complaints procedures as well as providing a point of reference for compliance issues and frequently asked questions.
